

Founded in 2008, the **German Center for Satellite-Communications r. S. (DeSK)** is an effective network bringing together enterprises, scientific institutions and universities.

The cooperation of regionally and nationally-based enterprises in the area of satellite-communications is strengthened and synergies initiated as a result of target-oriented activities.

Who defines the DeSK?

Our members!, acting along the value chain of satellite communications, incorporating their know-how within the network, for example in microwave and cryptographic technology, designing and constructing complete communication satellites and earth stations as well as procuring and operating satellite systems.

What do we offer?

- Support recruiting qualified employees
- Driving increased awareness and understanding of this highly specialized niche technology
- Acquisition of project funds
- Exchange of existing development results
- Interconnection of common areas of interest

The German Center for Satellite-Communications r.S. was one of the winners of the second regional cluster competition of the Ministry of Finance and Economy of Baden-Württemberg with its contribution **“DeSK – Initiative of Competence and Strategy Enlargement in the Area of Satellite Communications“**.

The promotion from the European Regional Development Fund (ERDF) supports the setup of a professional cluster management and as a result, expands the DeSK-activities.

The project includes the following pillars:

- Conception and implementation of a showroom
- Enlargement and improvement of management-structures
- Implementation of a sustainable public relations strategy
- Advancement of the strategy on an international level
- Implementation of events and other network activities

The close relationship to our members is our priority.

Connect the Best!

Benefit from synergies through target-aimed networking!
Present yourself on this unique national platform!
Become a member of this powerful network!
